Honed face
- **Waterfall Gully Award**
- **Completed projects**

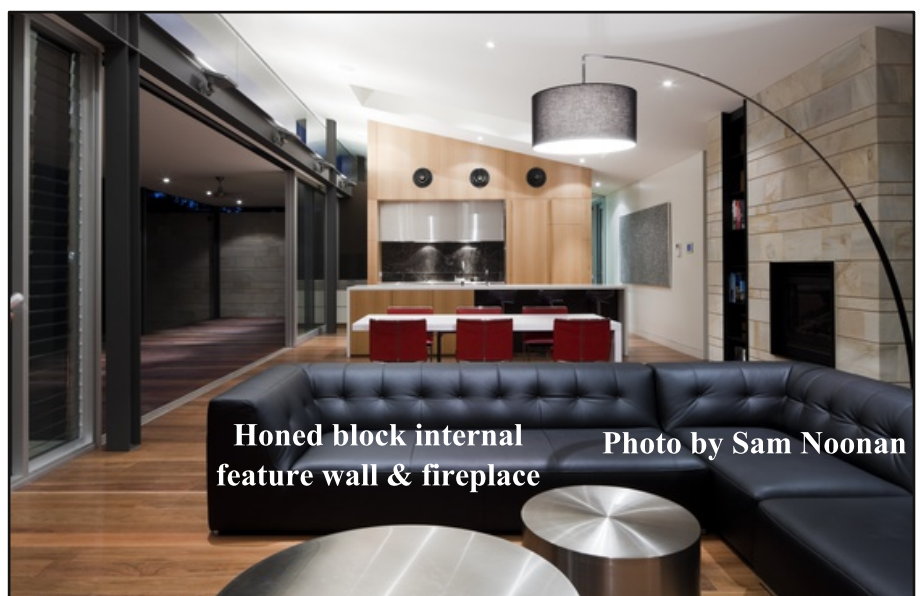

G'day Everyone,

In this newsletter we will be looking at our Honed face block, celebrating Flightpath Architects on a job well done, as well as showcasing just a few pictures that have been sent in to us from our family of stonemasons and builders.

We love receiving your photos, so please keep them coming in.

Our busiest time is only just around the corner, so please get your orders in early to avoid delays.

All the best from BRS....

## Product In Profile Honed Face

Honed block in stretcher<sup>1</sup>  
bond pattern

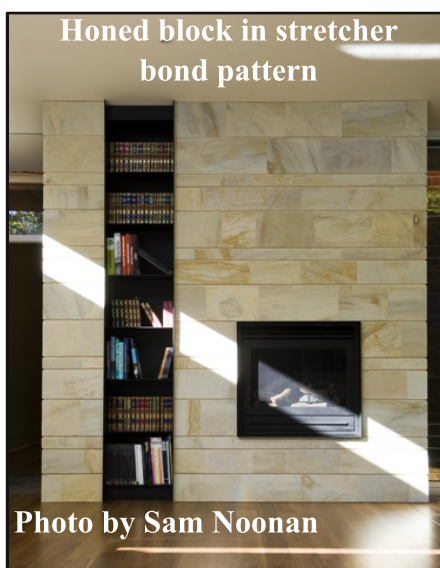

Honed veneer in  
random ashlar pattern

Our Honed face sandstone is a sawn face stone with the saw marks sanded smooth. It can be used for indoor and outdoor feature walls in commercial or residential buildings.

The look of our Honed face sandstone complements the clean, smooth lines of contemporary buildings.

Both block (110mm thick) & veneer (25mm thick) come in 3 standard sizes, 76mm, 162mm & 248mm with random lengths.

For a modern/contemporary feel choose the stretcher bond pattern, or for a classic look choose random ashlar.

## Commendation For Waterfall Gully Amenities

Basket Range Sandstone would like to congratulate Flightpath Architects on their Commendation for Small Project Architecture from the South Australian Chapter Of The Australian Institute Of Architects.

They were recognized for performing beyond their brief by integrating with the local landscape as well as keeping it functional.

Flightpath Architects used recycled sandstone sourced from the local area and in doing so, they have created a beautiful and long lasting impression for the local community.
